

SYGENFLO LABORATORIES LLP

Aiding Research for Better Life...

Impurity Standards:

Leading manufacturer and supplier of

- API Impurities.
- EP, USP, BP Impurity Standards.
- Pharmaceutical standards.
- Working standards
- Metabolites and Bio-Conjugates.
- Agrochemical Impurity Standards.
- Milligram to bulk quantities

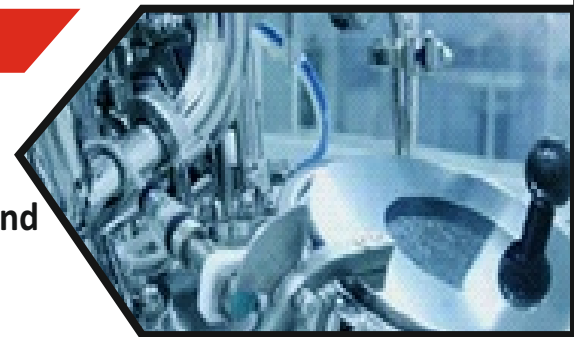

We regularly ship to customers throughout the world. All our products come with a detailed certificate of analysis (COA) including NMR, HPLC and MS to confirm structural identity and purity. On request, additional analytical data can be provided. Our standards are shipped with full documentation to ensure smooth customer clearance.

Exporter pharma intermediate and Lab Equipments.

- Sourcing of API intermediates- 5000+ pharma intermediates and any additional new inquiry also fulfil.
- For predefined regulated and non-regulated markets.
- Providing Catalyst, reagents, Solvents and consumables in small and bulk quantity.
- Offers flash chromatography machine, columns and accessories for purification.

Speed, reliability and Technical ability- our promise.

Contract Research

- Impurities standards, Pharmacological standards, metabolites, metabolic, Bioconjugates, scaffolds, building blocks, Intermediates, reference standards
- Intermediate scale up, route design and Optimisation
- Scale-up for *in-vivo* and Pre-clinical studies.
- Process Development & Technology Transfer

Custom synthesis

- Medicinal chemistry, Agrochemicals NECs, Library design and synthesis.
- Scaffolds and building blocks
- NCE scale up.
- Scale-up of molecules requiring multi step procedure

Chemistry expertise

- Organometallic reactions- Grignard, Organolithiums etc.
- Transition metal Catalyzed reactions- Suzuki, Buchwald, sonogashira, negishi and many others.
- Hydrogenations-. Ionic and molecular Hydrogenations
- Alkylations, Acylations, FC reactions C-C, C-N, C-heteroatom bond formation.
- Target oriented synthesis and functionalization of heterocycles
- High pressure reactions, low temperature reactions, high temperature reactions, air and moisture sensitive reactions.
- Scale up and route Optimisation

Each projects is treated under strict confidentiality agreement & ethical guidelines. Our services are by our deep expertise and long experience in organic synthesis.

All our products come with detailed certificate of analysis Including NMR, HPLC and MS to confirm structural identity of purity. On request, additional analytical data can be provided.
